

Denarii Dolor — Unit Test Results

Test plan	Unit Test Plan: Transaction Validation (TC-01 - TC-20)
Build	main + the plan's new test cases (uncommitted working tree)
Executed	2026-09-21 11:33 MST (18:33 UTC), host jabbott-iii-MSI
Command	./gradlew testDebugUnitTest createDebugUnitTestCoverageReport
Tooling	Gradle 8.11.1 · Android Gradle Plugin 8.7.3 · JUnit 4.13.2 · JaCoCo 0.8.12
Verdict	PASS: all exit criteria met

1. Summary

Measure	Result	Exit criterion	Met?
Plan test cases (TC-01 - TC-20)	20 / 20 passed	All pass	✓
Full unit suite	116 tests, 0 failures, 0 ignored, 6.86 s total	No regressions	✓
ValidateTransactionUseCase line coverage	97.4 % (37 / 38 lines)	≥ 90 %	✓
ValidateTransactionUseCase branch coverage	94.4 % (34 / 36 branches)	Every failure(...) reached	✓
Validators / Money line coverage	100 % / 90 %	Informational	—

Figure 1. Gradle's test report summary for the full unit suite: 116 tests, 0 failures, 100 % successful. This is a screenshot of `app/build/reports/tests/testDebugUnitTest/index.html`.

2. Results against the test plan

ID	Test method	Expected	Actual	Time
TC-01	rejectsZeroOrNegativeAmount	"Invalid amount" for 0 and -1	✓ Pass	3 ms
TC-02	rejectsBlankDescription	"Description cannot be blank"	✓ Pass	1 ms
TC-03	rejectsNonPositiveDate	"Invalid date"	✓ Pass	1 ms
TC-04	rejectsNonPositiveAccountOrCategoryIds	"Invalid account" / "Invalid category"	✓ Pass	1 ms
TC-05	failsWhenCategoryOrAccountMissing	"Category not found" / "Account not found"	✓ Pass	2 ms
TC-06	transferRequiresDestination	"Transfer destination is required"	✓ Pass	2 ms
TC-07	transferFailsWhenDestinationMatchesSource	failure	✓ Pass	2 ms
TC-08	transferFailsWhenDestinationAccountMissing	"Transfer destination account not found"	✓ Pass	1 ms
TC-09	validTransferPasses	success	✓ Pass	1 ms
TC-10	expenseFailsWhenBudgetExceeded	"Budget threshold violated"	✓ Pass	1 ms

ID	Test method	Expected	Actual	Time
TC-11	expenseExactlyAtLimitIsAllowed	success at limit; failure +1 ¢	✓ Pass	2 ms
TC-12	editedExpenseExcludesItsOwnPreviousAmountFromBudget	success; ID 7 excluded	✓ Pass	1 ms
TC-13	budgetOnlyLimitsExpenses	success	✓ Pass	2 ms
TC-14	expenseWithoutBudgetIsNotLimited	success	✓ Pass	1 ms
TC-15	repositoryErrorBecomesFailureInsteadOfCrash	Result.failure("database closed")	✓ Pass	3 ms
TC-16	amountAndDescriptionValidation	true/false per partition	✓ Pass	0 ms
TC-17	rangeValidationRejectsInvertedRanges	false, false, true	✓ Pass	1 ms
TC-18	nameAndPercentValidation	true/false per boundary	✓ Pass	0 ms
TC-19	parsesCommonInputsToCents	exact cents	✓ Pass	0 ms
TC-20	rejectsInvalidInputs	null for each	✓ Pass	0 ms

Every case produced its expected result on the first run. No product defects were found in the validation unit, so no production code changed as a result of this run (see the change-summary document).

Figure 2. `ValidateTransactionUseCaseTest`: 15 of 15 tests passed. This covers TC-01 – TC-15; the 9 cases added for this plan appear alongside the 6 existing ones.

Figure 6. Line-by-line coverage of `ValidateTransactionUseCase.kt`. Green means executed and a green diamond means all branches taken; yellow means some branches missed and red means not executed. Every `return failure(...)` line from the plan's decision flow is green.

The three lines that are not fully green were analysed and accepted:

Line	JaCoCo	Explanation	Action
38 suspend operator fun invoke(...)	red (not covered)	A Kotlin compiler artifact. The coroutine state machine attributes synthetic continuation code to the signature line. The body (lines 39–48) is fully covered, so the function clearly ran.	None
48 runSuspendCatching Ellipsis.getOrElse Ellipsis	1 of 4 branches missed	The missed branch is the coroutine's <i>suspended-and-resumed</i> path. The in-memory fakes return immediately and never actually suspend. Both the success and failure outcomes are covered (TC-05, TC-15).	None; the path is exercised by the instrumented Room tests
56 transferAccountId != null &&	1 of 2 branches missed	A defensive check. A transfer with a null destination has already been rejected on line 45 (TC-06), so the false branch is unreachable.	Kept as a guard for future callers

Figure 7. Coverage of the supporting helpers in `util` (`Validators`, `Money`).
